🌱 Micro forest schools – first partner meeting in Vejle! 🌱

Dear readers,

We are excited to share that we have successfully hosted the **first partner meeting** in the *Micro Forest Schools* project!

The meeting took place in **Vejle, Denmark**, where partners from **Denmark, Italy, and Greece** gathered to kick-start our collaborative journey.

🌱 A strong start to the project

Over two productive days, we worked together to **lay the foundation for the project**, ensuring a shared understanding of goals, roles, and expectations.

✅ **Project planning & collaboration** – We discussed the **action plans** for each work package, ensuring smooth coordination and clear responsibilities.

✅ **Site visits & inspiration** – We visited **Mølholm School and Jelling**, where we explored best practices in integrating **green initiatives in schools**.

✅ **Project management & strategy** – We covered key topics such as **financial management, reporting, quality assurance, risk management, and dissemination strategies**.

✅ **Building a strong partnership** – Through engaging discussions, practical workshops, and social activities, we strengthened our collaboration and commitment to bringing **biodiversity and climate education into primary schools**.
